

## Gloves and Protective Clothing

### Welding Gloves

#### TIG

TIG welding gloves are produced from a variety of fine leathers. Guard-Line's TIG welding gloves are specifically designed to provide adequate protection without sacrificing the high degree of sensitivity and touch precision TIG welding requires. Unlined to maximize dexterity, gloves are sized from small to extra large for just the right fit and feel. All styles come in either 2" safety cuff, (add SC suffix), or 4" gauntlet design.

Part No. TIG100

#### BB25 Blue Blazer

Blue Blazer's distinctive bright blue color is a Guard-Line original and is the symbol of excellence in high performance welding gloves. Large cut, in the welder preferred gunn pattern with one piece back, heat resistant select side split cowhide, BB25 is a full 14" long for an extra margin of protection, has fully welted seams sewn with Kevlar thread for exceptional durability, and has a full sock liner for wearer comfort.

Part No. BB25

#### Deerskin

Gunn pattern welding glove, split elkskin, straight thumb with thumb strap and pull tab. Full sock liner, turned down hem, 14" length, large cut.

Part No. 1750

### Triple K Elkskin Welding Gloves

Guard-Line's (Triple K) is one of the finest welder's gloves in the industry. This product is manufactured from heavy weight genuine grain elkskin. It is unlined for maximum sensitivity and dexterity. Other features include a wide reinforcing thumbstrap, pull tab and stitched with Kevlar thread. Sizes available are 8-12.

Part No. Triple K

#### Leather

For years the industry's standard in welding glove design. Pearl side split cowhide, one piece back, wing thumb, sock liner, welted vulnerable seams, large cut, 14" length.

### Firestop Clothing

Cool, comfortable, 100% cotton 9 oz. per square yard fabric, is used in most of our garments. The color is Visual Green. This fabric will maintain its flame resistance through many commercial and home launderings. Fire Stop® clothing will not melt or drip as do other fabrics. It is required by most steel mills and oil refineries, and meets or exceeds proposed government specifications.

Part No. HFS530

### Caps

Dress yourself in America's most popular caps. Each cap is individually handcrafted and thoroughly inspected.

Part No. 0470

We offer the highest standards of workmanship and styling, while at the same time an economical price.

## Leather Clothing

Naturally heat, spark and spatter resistant...rugged, durable leather continues to be the foremost material for protective clothing for welders and others exposed to extreme work environments. Guard-Line's commitment to quality results in leather clothing a cut above other brands in thermal resistance, durability and comfort.

Features like double lock-stitched seams, riveted stress points and quick release, anti-flashback snaps are standard throughout the line for added value.

Guard-Line's leather welders apparel garments are tailored with comfort and durability in mind. Top quality, number one select side split cowhide remains supple for exceptional comfort. This leather is tanned for maximum heat resistance and protects against abrasion, punctures and tears to stay on the job longer.
